Skills

TECHNICAL SKILLS

- HTML5
- CSS3
- JavaScript / TypeScript
- Git/GitHub
- CI/CD
- Regression testing
- Smoke & Sanity Testing
- Integration Testing
- API Testing
- Cross-browser testing
- Mobile testing (iOS/Android)
- End-to-End Testing (E2E)

PROGRAMS & TOOLS

- Playwright
- Postman
- Jira/YouTrack
- TestRail
- Testomat.io
- Figma
- Grafana
- Sentry
- Chrome DevTools
- Postman
- Proxyman
- Clarity
- Smartlook
- Stoplight
- BrowserStack

SOFT SKILLS

- Analytical thinking
- Communication
- Team Player
- Quick learner
- Result-oriented
- Punctuality
- Problem-solving
- Attention to detail
- Perseverance and commitment to continuous learning

Languages

English – Intermediate
Ukrainian – Native

Education

Certification I QA Automation Engineer

Yet Another QA School: Kyiv 2025

Certification I QA Automation Engineer

Hillel IT School: Kyiv 2020

Certification I Manual QA Engineer

GOIT Academy: Kyiv 2018

Certification I Accounting and Audit

Bila Tserkva National Agrarian University: Bila Tserkva

2011 - 2012

Summary

Experienced QA Engineer (6+ years) with expertise in test automation across diverse domains: e-learning platforms, AdTech systems, and FinTech products. Led complete test suite migration from Java/Selenide to TypeScript/Playwright, implemented CI/CD integration. Specialize in cross-browser testing, API testing (Postman/Playwright), mobile QA (iOS/Android).

Experience

Present
November

Automation QA engineer
Trinetix - Kyiv

Achievements:

- Built a test automation solution from scratch, oriented on team collaboration with static code analysis, and clearly defined code style
- Implemented parallel test execution, improving test stability, independence, and reducing execution time
- Fully automated smoke test suite and integrated it into CI/CD pipelines, enabling faster feedback on builds
- Automated regression test suite reducing manual testing effort from 2 weeks to about 4 hours
- Reduced automated test creation time by three times by implementing an AI approach to test development

Responsibilities:

- Developed and maintained a test automation solution (Playwright/TypeScript)
- Conducted code reviews to ensure code quality, consistency, and adherence to best practices
- Mentored QA engineers to migrate from manual to automated testing practices
- Analyzed product requirements (PBI) and created detailed test cases
- Managed test cases and test activities using Azure DevOps
- Investigated and analyzed defects, collaborating closely with developers for resolution
- Collaborated on CI pipeline setup and maintenance for automated test execution, Playwright test reporting, and integration with Azure DevOps
- Worked closely with distributed development teams (Ukraine & international)

November
2025

Manual and automation QA engineer
Treeum - Kyiv

Achievements:

- Started learning JavaScript/TypeScript to expand automation capabilities
- Mastered the Playwright framework for web testing
- Successfully migrated automation tests from Selenide/Java to Playwright/TypeScript
- Reduced test execution time from 30 minutes to 15 minutes after migration to Playwright
- Performed log analysis in Grafana and error tracking in Sentry
- Started manual testing of mobile applications on both iOS and Android platforms
- Began learning mobile app automation using the Detox framework

Responsibilities:

- Analyze requirements and create test documentation (test cases, bug reports, test summary reports)
- Perform functional, integration, regression, smoke, usability, cross-browser, and ad-hoc testing
- Perform REST API testing using Postman and Playwright
- Test mobile applications (iOS/Android)
- Analyze logs and system errors to identify root causes
- Collaborate with the support team to investigate and reproduce user-reported issues
- Create automated tests (approx. 40% of working time) using: Java, Selenide, JUnit, Gradle, Allure; JavaScript/TypeScript, Playwright
- Work across multiple projects, collaborating with developers

March 2021
August 2019

Manual QA engineer
SmartyAds - Kyiv

Achievements:

- Learned the programming language Java
- Learned Selenium/Selenide framework for web testing
- Learned TestNG, Gradle, Allure for test automation
- Created automated tests for web applications using Java, Selenide, TestNG, Gradle, Allure

Responsibilities:

- Analyzed project requirements and technical documentation
- Tested company's web applications and internal systems
- Created and executing test cases, test runs, bug reports, and test summary reports
- Performed functional, regression, usability, smoke, and ad-hoc testing
- Contributed to automation test coverage from scratch (Java, Selenium WebDriver, TestNG, Maven, Allure)
- Communicated with developers to clarify issues and ensure timely resolution
- Participated in team meetings and provided feedback on product quality
